- 10.2 Update from Fire Chief
- 11. Future Business:
- 11.1 Nothing at this time.
- 12. Accounts & Payroll (November 2023)
- 13. Confirming Motion; Adjournment & Next Meeting Date

SHELBURNE & DISTRICT FIRE BOARD

November 7, 2023

The Shelburne & District Fire Department **Board of Management** meeting was held in person at the Shelburne and District Fire Department on the above mentioned date at 7:00 P.M.

Present

As per attendance record.

1. **Opening of Meeting**

1.1 Vice Chair, Gail Little, called the meeting to order at 7:01 pm.

1.2 Land Acknowledgement

We would like to begin by respectfully acknowledging that the Town of Shelburne resides within the traditional territory and ancestral lands of the Anishinaabe, including the Ojibway, Potawatomi, Chippewa and the People of the Three Fires Confederacy.

These traditional territories upon which we live, work, play and learn are steeped in rich Indigenous history and traditions. It is with this statement that we declare to honour and respect the past and present connection of Indigenous peoples with this land, its waterways and resources.

We encourage residents to review the call-to-action information by visiting the following website to further educate oneself: https://www.dccrc.ca/educational-links/

2. Additions or Deletions

9.2 Township of Mulmur Resolution

3. Approval of Agenda

3.1 **Resolution # 1**

Moved by W. Mills - Seconded by E. Hawkins

BE IT RESOLVED THAT:

The Board of Management approves the agenda as amended.

Carried

4. Approval of Minutes

4.1 Resolution # 2

Moved by E. Hawkins – Seconded by G. Little

SHELBURNE & DISTRICT FIRE DEPARTMENT

"SERVING THE MUNICIPALITIES OF AMARANTH, MELANCTHON, MONO, MULMUR AND SHELBURNE"

Chief Snyder,

I would like to provide you with a brief synopsis of the recent meetings I've attended regarding the radio system upgrades being proposed.

I have been meeting with representatives of the Orangeville Fire Department, Grand Valley & District Fire Department and the Mulmur – Melancthon Fire Department to determine a means of creating a resilient, safe, and effective radio system for the fire services in Dufferin County.

During ice storms, wind events, poor travel conditions, drought conditions and any time multiple departmental responses occur we are faced with communications issues amongst fire services in Dufferin County. These events are becoming more frequent due to climate change, increase in population, increase in vehicular traffic and the resulting calls for service by all departments in the county.

With the proposed plan there would be fewer areas of the county where radios can not communicate with the dispatch center in Tillsonburg, there would be a greater reception for the paging system allowing for increased response of personnel, and incidents of minor nature would operate on their own simplex radio channel creating less opportunity for missed messages due to multiple users on the same channel.

As you know, with the current system we utilize the same radio channel we get paged out on for major incidents. It is not uncommon to call for assistance from a neighboring department only to have to wait for paging to occur before the fireground can communicate again. Surveys have indicated that increased radio traffic has been detrimental to 47% of mayday calls on the fireground and 72% of maydays are called by the first arriving pumper. These statistics align with a timeline of when our incident commanders would be calling for additional resources. This new system would decrease the potential for communication issues during a mayday situation.

Essentially paging will receive its own channel and fires would receive their own channel that could be used by any Dufferin County department providing a direct link to our dispatch provider.

If this project can move forward the service provider would be utilizing some of the same infrastructure that is already in place while adding upgraded hardware to the current communications sites. These upgrades would create greater interoperability within the county during major events.

-

¹ Facts about Firefighter Maydays – What Every Fire Officer and Firefighter Needs to Know.

Tomorrowsfireofficer.com, February 19, 2019

² Maydayproject.com

Although I would like to see a more modern approach to communications within the county and to move away from the VHF system currently in place, I understand the budgetary constrictions we face.

It is my opinion that this project is a step in the right direction towards mitigating a potential health and safety issue as it would provide a safer fireground for our members and the members of our neighboring departments.

Professionally Submitted,

Jeff Clayton Deputy Fire Chief

SHELBURNE & DISTRICT FIRE DEPARTMENT

"SERVING THE MUNICIPALITIES OF AMARANTH, MELANCTHON, MONO, MULMUR AND SHELBURNE"

Chief's Message

It is my privilege to present the 2022 Annual report for the Shelburne and District Fire Department.

2022 was a rebound year after the challenges of the post Covid-19 Pandemic. The members of SDFD continue to deliver professional and excellent service to the communities, and we should be incredibly proud of their dedication to excellence, knowledge, skills, and teamwork to serve the 5 municipalities 24 hours a day, 365 days a year.

SDFD accomplished the following successes in 2022:

- Responded to 333 calls for service.
- Achieved an average curb time of 5 minutes 55 seconds, from dispatch until the first apparatus out the door.
- Spent 399 actual hours responding to those incidents for a total of 3293 individual staff hours and 2146 individual responses by our members to answer calls for service.
- Attended 104 training sessions and meetings for a time commitment of approximately 2016 hours.
- Firefighters were able to complete 14 Public Education opportunities with different groups. This included participation in an escape plan contest for all 4 elementary schools in our coverage area, neighbourhood blitzes on smoke and C0 alarms, as well as our annual open house in October. In total nearly 50 hours of Public Education were delivered to our customers.
- Placed a new Pump 27 into service.

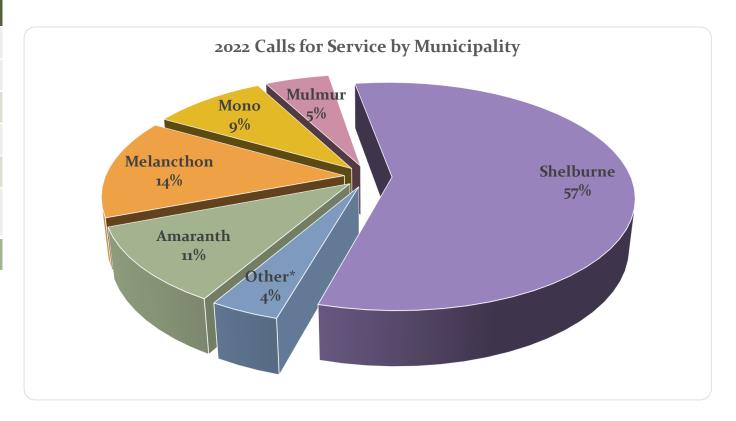

Our members continue to show strong commitment to the community, and I am proud to lead this dedicated team.

Respectfully and Professionally Submitted,

Chief Ralph Snyder

SHELBURNE & DISTRICT FIRE DEPARTMENT

"SERVING THE MUNICIPALITIES OF AMARANTH, MELANCTHON, MONO, MULMUR AND SHELBURNE"

2022 Firefighter Training

Our dedicated Firefighters attended a total of 97 training sessions in 2022 for a total of 2095 total staff hours. Instructors committed 272 hours to delivery of training.

We also have monthly officer meetings at which we discuss training topics and lead instructors for each topic.

We generally divide into two training topics on a weekly basis and trainees switch topics each week. The training schedule is set at least 1 month in advance and a written lesson plan is prepared and approved by Chief Officers.

Outside of the scheduled internal training we had external training opportunities, but these were limited by availability. We are starting to see an improvement in the availability through the expansion of Regional Training Centers within a reasonable travel distance.

Each member of our dedicated rope rescue team committed over 40 additional hours to maintaining their competency with this technical skill.

The training library continues to be well utilized by the members. Materials including texts, videos, and workbooks were signed out regularly. We are progressing with a blended training program using Fire Learning Management System software, where firefighters can do theory training online, and complete practical skills at live training.

We have a good percentage of our firefighters certified to the NFPA Firefighter II standard or higher, with the remainder actively working to achieve certification.

Additionally, we have members NFPA certified as Fire Officer, Fire & Life Safety Educator, Fire Inspector, Fire Investigator, and Fire Instructor. We have had 3 members complete their NFPA Fire Officer level 1 training. All training records continue to be maintained electronically on our FirePro2 software.

2022 Standard Incident Report Verification

It is important that OFM has ALL of the 2022 SIR reports for your department. Please review the following sections. (Note: this report only shows data received prior to the date of this report, 03-May-2023)

- 1. Last report received: shows the date of the last report on file for 2022. Please file late reports as soon as possible.
- 2. The Emergency Call Summary shows the total reports received by OFM as of the date of this report.
- 3. Total Emergency Response into other Municipalities shows total calls by the department into neighbouring municipalities.
- 4. The **Monthly Summary** section shows the total fire and non-fire reports received by month.
- 5. The **Exposure Fires** section shows fires where the department reported exposure fires and notes where reports are missing.
- 6. The Injuries Reported/ Received section shows the total injuries reported and the number of full Injury reports filed.
- 7. NEW! The Fatalities Reported/ Received section shows the total injuries reported and the number of full Injury reports filed.
- 8. The NO LOSS OUTDOOR fire section lists incidents that do not meet the criteria for this response type and must be revised.
- 9. The Missing/Invalid PROPERTY section lists fire calls with invalid and missing property codes that must be revised.
- 10. The Missing/Invalid LOCATION section lists calls with invalid and missing location/ municipal codes that must be revised.
- 11. The **Duplicate Records** section lists calls that are duplicated (same dates, times, address, response type).

For a full LISTING OF ALL FIRE CALLS: e-mail your request to ofmstatistics@ontario.ca with your FDID in the subject line.

PLEASE VERIFY AND CONFIRM WITH THE OFM:

- If the information shown in these reports is correct, please email ofmstatistics@ontario.ca and confirm that no revisions are required. Include your FDID in the subject line.
- If revisions are required please file these changes as soon as possible by resubmitting the SIR report(s).

2022 Standard Incident Report Verification

Exposure Fires: (If there are no incidents listed, there are no reports of exposure fires.)

Listed below are the fire reports where there is a total reported in the "Total Exposures" field, or "Exposure number" field, or where the "Extent of Fire" field was code "11 - Spread beyond building of origin, resulted in exposure fire(s)".

Heat and/or Smoke damage do not qualify as exposure fire - there must be fire spread between the properties._
Response Type code "3-NO LOSS OUTDOOR FIRE" does not qualify as exposure fire - all exposure related calls must have Response Type "1-Fire" or "2-Explosion".

Please review this listing and ensure that there is a fire report for each of the exposure fires. There should be one exposure fire report (in addition to the intial fire report) for every property that was ignited as a result of the initial fire.

All related exposure fires are listed together with the originating fire report. If you see "Missing exposure fire..." or "Invalid exposure fire.." notes printed below, please:

- a) submit the additional required reports, OR
- b) revise the "Extent of Fire" or "Total Exposures" or "Exposure Number" fields, OR
- c) revise the "Response Type" to "1-Fire" and resubmit the SIR with Section B completed.

| 2221 Incident D | 00 Date and call time | Response type Property type | Extent of Fire (i.e. spread) | Total # Exposures | Exposure Number | Address |
|--------------------|---------------------------------|-----------------------------|------------------------------|----------------------|---------------------------|---------|
| FD incident | # | | | | | |
| | | | | | | |

Injuries Reported/ Received:

(If there are no incidents listed, there are no reports of applicable injuries.)

*Calls where an injury total was reported on the SIR, or an injury report was received, are listed below.

If the TOTAL INJURY REPORTS RECEIVED does not match the TOTAL INJURIES REPORTED (on SIR), then the entire section will have a grey background, and we are asking you to review those reports. Please provide a revised SIR injury count or resubmit the incident with the missing injury report. At the end of the year OFM will revise the number of injures on the SIR to match the number of Injury reports received. **Fatalities not included** in this report, contact OFMEM for fire deaths.

NOTE*: Excluded from this list are Non-fire Civilian Injuries (civilian injuries are accepted for response codes 1 & 2 only), as well as response code "3-No loss outdoor fire" records (injuries not allowed for response code "3").

2221 00

| Response Category: | Fire response | Total Injury records received: | 0 | Total Injuries reported on the SIR: | civ: 0 | FF: | 0 |
|--------------------|---------------|--------------------------------|---|-------------------------------------|--------|-----|---|
| Response Category: | Non fire call | Total Injury records received: | 0 | Total Injuries reported on the SIR: | | FF: | 0 |

2022 Standard Incident Report Verification

NEW! Fatalities Reported/ Received:

(If no incidents listed, there are no reports of deaths (see notes))

*Calls where a fatality total was reported on the SIR, or a fatal injury report was received, are listed below (see notes). Please contact OFM to verify any non-fire related FIREFIGHTER deaths!

If the TOTAL FATAL INJURY REPORTS RECEIVED does not match the TOTAL FATALITIES REPORTED (on SIR), then the entire section will have a grey background, and we are asking you to review those reports. Please provide a revised SIR fatality count or resubmit the incident with the missing FATAL injury report. At the end of the year, OFM will revise the number of fatalities on the SIR to match the number of confirmed and verified fire deaths investigated by the office.

Important NOTES*:

- Excluded from this list are Non-fire civilian fatalities (civilian deaths are accepted for response codes 1 & 2 only).
- Excuded from this list are response code "3-No loss outdoor fire" records (deaths not allowed for response code "3").
- OFM investigates all fatal fires in the province and will revise municipal fire death counts at year end to match verified and confirmed fire deaths reported by the Coroner and OFM fire investigators!

2221 00

| Response Category: | Fire response | Total Fatal records received: | 0 | Total Fatalities reported on the SIR: CIV: | 0 FF: | 0 |
|--------------------|---------------|-------------------------------|---|--|-------|---|
| Response Category: | Non fire call | Total Fatal records received: | 0 | Total Fatalities reported on the SIR: | FF: | 0 |

Response Type Code "3-NO LOSS OUTDOOR fire" Report Errors:

Definition: **No loss:** i.e. no fatality, and no injury, and \$0 loss **AND Outdoor:** i.e. open land, trash container outside, etc. **Exclusions:** fires occurring in structures, vehicles, recycling/dump sites, exposure fires, or outdoor fires where arson, vandalism or children playing was suspected.

The incidents listed below **do not meet the criteria** for Response code 3, they each have one of - a \$ loss or injury or death or structure or vehicle property type reported. These incidents should be resubmitted as response type code "1 - Fire" with sections B/ C completed where applicable (see definition above).

Please revise these incidents (if there are no incidents listed, there are no reports of this type with errors) and send updated reports to OFMStatistics@ontario.ca or update the report on the OFM data entry website.

2022 Standard Incident Report Verification

The Shelburne and District Fire Department employs a wide range of fire apparatus and vehicles, along with tools and equipment, in carrying out its core mission. The department's vehicle fleet includes emergency response apparatus such as firefighting pumpers, aerial ladder apparatus, a water tanker (water supply vehicle), and a rescue vehicle. In addition, the fleet includes specialized apparatus support vehicles. The rescue and support vehicles can include hazardous materials response equipment, decontamination devices and diking materials, rehabilitation supplies and scene lighting.

The mission, duties, demographics, geography, and construction features within the community all play a major role in the make-up of the apparatus and vehicle inventory. These factors, as well as the funding available, are taken into consideration when specifying and purchasing apparatus and vehicles. Additionally, every effort is made to make apparatus and vehicles additions and replacements as versatile and multifunctional as possible.

It is a generally accepted fact that fire department apparatus and vehicles, like all types of mechanical devices, have a finite life. The length of that life depends on many factors, including vehicle mileage and engine hours, quality of preventative maintenance, and the quality of the driver operator training program. Also, longevity can be impacted by whether the fire apparatus is used within the design parameters, whether the apparatus was manufactured on a custom or commercial chassis, quality of workmanship by the original equipment manufacturer (OEM), quality of the components and materials used, and availability of replacement parts, to name a few. In the fire service, there are fire apparatus with 8 to 10 years of service that are simply worn out. There are also fire apparatus that were manufactured with quality components, that have had excellent maintenance, and that have responded to a minimum number of incidents that are still in serviceable condition after 20 years. Factors influencing apparatus replacement are age, mileage, cost per mile, and overall condition of the vehicle. The most emphasis in this document is placed on age and mileage.

Throughout this document, data as of September 1, 2023, are provided to illustrate the age, mileage, and the asset degree of physical condition using the scale as shown in Table 1.

| GRADE | DESCRIPTION |
|-----------|---|
| Very Good | The asset is typically new or recently rehabilitated. |
| Good | The asset has some components that show general signs of deterioration that require attention. |
| Fair | The asset shows general signs of deterioration and requires attention. |
| Poor | The asset is mostly below standard, with many components approaching the end of their service life. |
| Very Poor | The asset is in unacceptable condition with widespread signs of advanced deterioration. |

Table 1: Degree of Apparatus and Vehicle Physical Condition Scale

Overall, the department has a comprehensive inventory of apparatus and other vehicles. It is the position of the department that it is well equipped to meet the types of emergency situations that it is likely to encounter within its urban, suburban, and rural characterized boundaries. The average age of the department five front-line apparatus is 9.6 years, with the oldest being 18 years of age.

We are implementing a new program; it includes an assessment of the apparatus or vehicle to determine status and replacement. The new program utilizes an assessment and inspection process for moving an apparatus from in service to retirement. While apparatus data and records are maintained throughout the life of the vehicle, more focused evaluations are conducted during preventative maintenance servicing and annual performance testing (i.e., fire pump and aerial ladder). Apparatus undergo a multisection assessment and inspection process conducted by the department's outside service providers and internal personnel. The process includes an inspection to assess the condition and performance of the apparatus. A recommendation for retirement of an apparatus or vehicle is made by the fire department administration to the Fire Board. The adopted apparatus replacement program is efficient, cost effective, and a best practice.

NFPA 1901: Standard for Automotive Fire Apparatus, 2016 edition, serves as a guide in the design of fire apparatus; while NFPA 1911: Standard for the Inspection, Maintenance, Testing, and Retirement of In-Service Automotive Fire Apparatus helps ensure in-service fire apparatus are serviced and maintained to always keep them in safe operating condition and ready for response. The documents are updated every five years, using input from public and private stakeholders through a formal review process. The committee membership is made up of representatives from the fire service, manufacturers, consultants, and special interest groups. The committee monitors various issues and problems that occur with fire apparatus and attempts to develop standards that address those issues. A primary interest of the committee over the past years has been improving firefighter safety and reducing fire apparatus accidents. The Annex Material in NFPA 1911 contains recommendations and work sheets to assist in decision making in vehicle replacement. With respect to recommended vehicle service life, the following excerpt is noteworthy: "It is recommended that apparatus greater than 15-years old that have been properly maintained and that are still in serviceable condition be placed in reserve status and upgraded in accordance with NFPA 1912, Standard for Fire Apparatus Refurbishing, to incorporate as many features as possible of the current fire apparatus standard. This will ensure that, while the apparatus might not totally comply with the current edition of the automotive fire apparatus standards, many improvements and upgrades required by the recent versions of the standards are available to the firefighters who use the apparatus." The standard goes on to state; "Apparatus that were not manufactured to the applicable apparatus standards or that are over 25 years old should be replaced."

Apparatus Overview

Pumping Apparatus

Firefighting pumpers, also known as engines, are the bread and butter to a fire department. This type of apparatus is comprised of three main elements: pump, water, and hose. Front-line pumpers have at minimum a 1,250 gallons per minute fire pump, 750 gallons of water, and 30 gallons of Class A firefighting foam. In addition, each pumper must have at least 700 feet (ft.) of large diameter hose, 700 ft. of 65mm hose, 700 ft. of 45mm hose, various nozzles, adaptors, limited forcible entry tools, thermal imagining camera, and 48 ft. of ground ladders and life support equipment to meet the fire protection and emergency medical service demands of the community, as well as NFPA standards and requirements. The primary jobs of pumpers and personnel are to establish a constant water supply, minimize fire and smoke exposure to other structures, and eliminate the source of the fire. Both apparatuses are in very good condition and were manufactured with the latest safety features.

Aerial Ladder Apparatus

The department operates one aerial ladder truck – also called a truck company or ladder company. This apparatus is rarely assigned to respond alone; it typically is assigned to incidents with pumpers or other apparatus. Along with a full cache of rescue, ventilation, and cutting equipment, it carry's numerous ground ladders, and a 100-foot hydraulic powered aerial ladder. On fire scenes, ladder companies are responsible for laddering, overhaul, ventilation, forcible entry, search and rescue, salvage, and utility control. This apparatus is useful in situations requiring an elevated access for rescue operations, restricted access or master stream operations. Overall, this apparatus is in very good condition and was repaired to pass the every 5 year required non-destructive testing in 2022.

Technical Rescue Apparatus

The department's one rescue apparatus is the nucleus of special operations and technical rescue operations. The department has one rescue unit built by Oro Design on a 2004 International 4400 chassis. It is charged with providing the necessary personnel and equipment to rescue individuals trapped in life-threatening situations. This apparatus is a critical asset during routine fire incidents, as well as those less common, such as vehicle extrication, machinery rescue, and other incidents that required a specialized response capability. The rescue apparatus is very much like a huge rolling toolbox operated by firefighters. It is an essential component of the department's response potential and proficiency. The apparatus is deteriorating, and the design has some concerning safety issues.

Mobile Water Supply Apparatus

The department utilizes mobile water supply apparatus to support firefighting in situations where water supply may be impacted, such as areas of the Township without public water service and fire hydrants. These types of apparatus are better known as "tenders" or "tankers", which are designed primarily for transporting water to fire emergency scenes to be applied by pumping apparatus. The department has one 2,500 imp. gallon unit built by Seagrave on a 2009 International 7600 chassis. It also available for mutual aid responses to communities that collaborate and cooperate with SDFD. In general, the apparatus is safe and reliable, and in fair condition.

The department operates two staff and utility vehicles for transporting personnel to conduct the department's daily business and equipment between the fire station and incident scenes. These assigned vehicles can also be utilized to transport gear and equipment for emergency incidents as needed.

The Fire Chief is assigned a staff vehicle (C21), he or she is "on call" 24-hours a day, seven days a week. It is a Ford Explorer Police Interceptor previously operated by the Shelburne Police department. It has seen some mechanical issues and rated as poor condition.

The other utility vehicle (C22) is housed at the fire house for use by any firefighter. The primary use is for the Deputy Chief to respond and use as a command vehicle in the Chief's absence. This vehicle may be used for conducting approved department business, driving out of town for fire department related training, or responding to emergency incidents. The vehicle provides the ability to carry resources to conduct fire and life safety inspections, fire scene investigations, as well as store personal protection equipment. It is rated in very good condition.

| Vehicle | Туре | Year | Manufacturer & | Mileage | Condition | Planned |

SHELBURNE & DISTRICT FIRE DEPARTMENT

"SERVING THE MUNICIPALITIES OF AMARANTH, MELANCTHON, MONO, MULMUR AND SHELBURNE"

Chairman and Members of the Shelburne and District Fire Board of Management.

I thank the fire board again for giving me the opportunity to lead this fire department.

2022 was another great year for the Shelburne & District Fire Department. Our firefighters continued to show their professionalism with commitment to supporting our communities through training and response.

With the transition towards full NFPA certifications. All firefighters will be required to achieve NFPA certification for the roles they perform under our Establishing and Regulating bylaws under this new mandate starting in July of 2026.

We continue to review the long-term replacement plan to evaluate options for maintaining a viable emergency response fleet. We are continuing to see an increase upwards of in the cost of new fire apparatus. The firehall could benefit greatly from the installation of a SCBA cylinder filling station as we currently rely on neighbouring departments for our breathing air. We have secured a grant from Farm Credit Canada to help offset this capital purchase in 2023.

We are still facing challenges with the training of our Firefighters and Officers. We continue to investigate new ways to achieve training goals. We have discussed some learning contracts with the OFM and will pursue this alternative to continue education and training. We have some very qualified personnel to lead in-house courses. Training on live fire, search, rescue, and firefighter survival in a realistic environment may be a more expensive endeavor at regional centers. We are in the process of installing a small training facility with assistance from The Shelburne Firefighters Association, who have purchased 3 shipping containers to house the training area.

SDFD call volume increased to pre-pandemic levels with an increase of 97 calls or 41% over 2021's responses. We anticipate the needs of residents in our catchment area to continue to result in higher call volumes. We should continually address potential growth of department resources and service delivery model changes to meet future challenges with the professional service that our residents have come to expect.

"SERVING THE MUNICIPALITIES OF AMARANTH, MELANCTHON, MONO, MULMUR AND SHELBURNE"

Fire Chief's Report for

Department Activities

- Inspections 5
- Training 12 sessions
- Incident Responses 29
- CDDHS Life skills class visit
- Annual SCBA inspection and repairs
- Annual SCBA Fit testing of firefighters
- Remembrance Day services at Horning's Mills and Shelburne
- Purchased and assembled new training room tables.
- Delivered Smoke/C⁰ Alarms to Shepard's Cupboard Foodbank
- Installation of new SCBA compressor and fill station
- Repairs to P24 (vacuum leak)
- Replaced batteries in T25

Chief's Activities

- Hicks Morley webinar, "A Practical Guide to Recognizing & Addressing Discrimination in the Workplace".
- Coordinate with Dufferin Fire Chiefs on GIS mapping of response areas for Next Generation 911
- Prepare 2022 SDFD Annual Report
- Met with new OFM advisor John Doucet many questions about operation under the Fire Board system.
- Provincial mutual aid webinar
- Attended Mulmur public meeting regarding Lit Music Festival
- Purchased used chairs for training room on GovDeals
- Dufferin County Fire Chief's meeting
- WDGPH Designated officer webinar
- Preparing data for consultants on Community Risk Assessment
